

Demonstration of Proposed Features

Date	2 October 2026
Team ID	6ab7f80ad083b0e2ee72b17e
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	User Interface	Provides a simple web interface (HTML/CSS with Jinja2 templates) where students choose a task from a dropdown, enter a topic, question or study text, and view the result below the input.	Implemented	Yes	Demonstrated the single-page web UI with task dropdown, input box and result display.
2	FastAPI Backend & Local Setup	Python FastAPI backend served using Uvicorn that routes each student request to the correct feature module and runs locally.	Implemented	Yes	Demonstrated running the application locally with Uvicorn and request routing to feature modules.
3	Concept Explanation	Gives simple, student-friendly explanations of difficult topics through the /explain route using the local LaMini-Flan-T5-783M model (works offline).	Implemented	Yes	Demonstrated entering a topic and receiving an easy-to-understand explanation from the local model.
4	Question & Answer	Answers student doubts using the Google Gemini API through the /qa route.	Implemented	Yes	Demonstrated asking a doubt and receiving a Gemini-generated answer.
5	Content Summarization	Converts long study text into concise revision points using the Google Gemini API (/summarize).	Implemented	Yes	Demonstrated pasting a long passage and getting short revision points.
6	Quiz Generation	Generates personalized practice questions on a topic using the Google Gemini API (/quiz).	Implemented	Yes	Demonstrated generating quiz questions for a given topic.
7	Learning Path Recommendations	Suggests what to learn first and next with a personalized learning roadmap using the Google Gemini API (/learn/recommendations).	Implemented	Yes	Demonstrated receiving a step-by-step roadmap for a chosen topic.
8	API Key Security & Error Handling	Stores the Gemini API key securely in an environment variable and shows clear error messages when a request or API call fails.	Implemented	Yes	Demonstrated secure key usage and friendly error messages for failed requests.

Feature Implementation Summary:

Total Features Proposed	8
Total Features Implemented	8
Total Features Demonstrated	8
Overall Implementation Rate (%)	100%
