

Student learning journey

EduGenie: Google Gemini Powered Learning Assistant

SCENARIO Using EduGenie to clear doubts, plan what to learn next, and revise with practice																				
Entice How does a student first realize they need learning support?			Enter What does the student experience as they begin?			Engage In the core moments, what happens?					Exit What does the student experience as the process finishes?				Extend What happens after the immediate learning is over?					
Steps What does the student typically experience?			Meets a hard topic Struggles with a concept while studying	Notices the gap Unsure what is already understood	Decides to seek help Wants simple help without long searching	Identifies the need Explain, ask, summarize, practice or plan	Opens EduGenie Loads the web page in a browser	Picks a task Chooses from the task dropdown	Enters a concept Types a difficult concept	Asks a question Types an academic doubt	Pastes content Adds a long passage to revise	Enters a topic For a quiz or a learning path	Gets AI support Submits and the result appears	Reads the answer Simple, student-friendly explanation	Reviews the summary Reads concise revision points	Takes the quiz Answers 3 practice questions	Reads the path Personalized roadmap from the basics	Spots the next topic Sees what to study after this	Continues learning Studies the next topic or revisits notes	Returns for a doubt Makes a new request when needed
Interactions What interactions do they have at each step? Things: What digital touchpoints would they use? Places: Where are they? People: Who do they see or talk to?			Things: Textbook, notes or class material Places: Wherever the student studies	Things: The concept or doubt that is unclear	Things: Decision to try EduGenie	Things: Five task options Places: Student's study setting	Things: EduGenie web page Places: Browser, local prototype	Things: Task dropdown (Explain, QnA, Quiz, Summary, Recommend Path)	Things: Text area and submit button Places: EduGenie web interface	Things: Text area and submit button	Things: Text area for long content	Things: Text area for the topic	Things: Result area below the input People: Student only; the AI is not a person	Things: Simple explanation or answer Places: EduGenie web interface	Things: Concise revision points	Things: Practice quiz with four options per question	Things: Personalized roadmap with resources	Things: Learning path output Places: Student's study setting	Things: Own study material plus EduGenie output	Things: Same web page, new request
Goals & motivations At each step, what is the student's primary goal? ("Help me..." or "Help me avoid...")			Help me find a way into this topic	Help me see what I do not understand yet	Help me avoid spending long searching for explanations	Help me pick the right kind of support	Help me start without extra complexity	Help me avoid confusion over which task to use	Help me understand this difficult concept simply	Help me clear my doubt and feel confident	Help me revise long material quickly	Help me practice or see a learning path	Help me get a clear result without hassle	Help me understand the answer at my level	Help me review key points quickly	Help me check if I am ready for exams	Help me follow topics in a logical order	Help me know what to learn next	Help me continue in a logical progression	Help me avoid uncertainty about the next topic
Positive moments What steps does a student find enjoyable, productive, motivating, or delightful?				Naming the exact difficulty shows the knowledge gap			One page offers several kinds of study help	Choosing a task is a single dropdown	A hard concept comes back in simpler language	A doubt gets a direct, concise answer	Long content shrinks to concise revision points	Practice questions and a plan give direction	The result appears right below the input	Simple wording builds confidence	Revision gets easier with concise content	A wrong choice is corrected, so practice teaches	A personalized roadmap shows where to start	A clearer idea of what to learn next	Learning can continue in a more structured way	
Negative moments What steps does a student find frustrating, confusing, uncertain, or time-consuming?			Not sure how to approach the concept	Material can feel hard to interpret alone		Unsure which type of help fits best			May struggle to word the concept clearly	May struggle to frame the question	Too little context gives less useful support	May need to rephrase or refine the input	An explanation may still need clarification	Output should be checked against course material	Deeper doubts may still need a teacher or textbook	Three questions may not cover the whole topic	Unsure the path matches their actual level			Unsure whether the next topic matches the real need
Areas of opportunity How might we make each step better? What ideas do we have?						Idea Add a quick diagnostic to find knowledge gaps			Idea Use subject and course context for relevant help	Idea Show sample questions to help phrase doubts	Idea Offer notes as text, examples or visuals	Idea Plan study around subjects, deadlines and time	Idea Explain in another form when one is not enough	Idea Remind students to verify against course material		Idea Adapt quiz length and level to the student	Idea Build a study plan from the roadmap	Idea Track progress towards measurable goals		Idea Explain why each next topic is recommended

The student can follow any one learning path (explanation, Q&A, summary, quiz or learning path) depending on the need; the paths are not a required sequence. Rows 4 and 5 describe expected student experiences, not measured results. Areas of opportunity are improvement ideas, not features that exist today.
